

Digital GIS Environmental Monitoring System for ICCT Binangonan Campus Project Checklist (100%)

Phase 1 – Planning and Setup (10%)

- 1 ■ Gather requirements from client
- 2 ■ Review 2D campus map layout
- 3 ■ Set up project repository and database
- 4 ■ Configure development environment

Phase 2 – GIS Campus Map Development (25%)

- 1 ■ Create digital GIS map based on the provided campus layout
- 2 ■ Add map markers and location coordinates
- 3 ■ Verify accuracy of campus locations

Phase 3 – User Authentication and Authorization (15%)

- 1 ■ Create login page
- 2 ■ Implement user authentication
- 3 ■ Define user roles and access permissions

Phase 4 – Environmental Issue Reporting Module (20%)

- 1 ■ Create form for reporting environmental issues
- 2 ■ Allow users to add descriptions and locations
- 3 ■ Save reports to the database
- 4 ■ Include report date and necessary details

Phase 5 – Interactive Monitoring Dashboard (15%)

- 1 ■ Display reported issues on the map
- 2 ■ Create map-based interface for administrators
- 3 ■ Enable viewing and tracking of environmental concerns

Phase 6 – Environmental Management Features (5%)

- 1 ■ Provide tools for monitoring and prioritizing issues
- 2 ■ Assist administrators in planning environmental actions

Phase 7 – Testing and Bug Fixing (5%)

- 1 ■ Perform system testing
- 2 ■ Fix identified bugs
- 3 ■ Verify all modules are functioning properly

Phase 8 – Deployment and Turnover (5%)

- 1 ■ Deploy system to Vercel
- 2 ■ Conduct final checking
- 3 ■ Deliver source code and documentation
- 4 ■ Client acceptance and project turnover

Module	Percentage
Planning and Setup	10%
GIS Map Development	25%
Authentication	15%
Environmental Issue Reporting	20%
Monitoring Dashboard	15%
Environmental Management Features	5%
Testing and Bug Fixing	5%
Deployment and Turnover	5%
Total	100%
